

The administration, faculty, and staff encourage open communication between students and faculty regarding course work, teaching methods, student concerns, etc.

- Should a problem arise within the class or clinical setting, the student should first speak to the faculty member involved.
- The Academic Advisor may be used as a resource at any step within the problem solving process.
- If the problem is not satisfactorily resolved at this point, the student should then speak to their Program Director.
- If the problem is related to the College facility, the College Secretary should be contacted.
- If the problem remains unresolved, the Student Fair Treatment Policy and Procedure may be initiated.
